

Location number one will begin your fun. It points up to blue and has your first clue. Get it.

You'll need a pencil. Get one from the sum of clues one and three.

Location number two would be fun for monkey's at the zoo. Get the number card.

You'll need an eraser. Get one from the difference of clues four and two.

Plain and simple, number three is a tree. Now go and find it if you can see. Get the number.

You'll need some chewing gum to think. Go to the product of card five and one.

Number four is across the big green "floor" outside by the playground. Run, run, run to find it and bring it back.

Now something to drink for your sweet treat, please solve the first side of your worksheet.

Number five is the end. If you go around for a spin you'll find the clue and win. Go get it!

Such a sweet treat, this is a math class that cant be beat! Solve the second side and you are done.
