

We start southwest of the circle...where a Christmas tree is made of all lights...Where are we?

Begin at the place where you can see a play and then stay in a room that isn't yours.

This is the building spelled with an "o" not an "a." Its dome is 130 feet high.

Next, go to the center of the fun, where the nutcrackers stand tall in the winter.

Visit the museum and then, can you travel to the top? What does it look like from there?

Find these landmarks: another theater, where the orchestra plays, and a very fancy church.

Who knew there were four more parks in this big city? Can you find them all?

What's the big white beautiful building to the west?

And now, to the beautiful mirrored building....with what inside?

Two more stops - First, to the "Win Diamond" and finally al museo de arte.
