

You find me in the middle of two coniferous trees. I'm used to pass on valuable information.

I am located behind a public place that is guaranteed to pass on valuable knowledge. I'm full of books, dvds and periodicals.

I am a place where you place cardboard and paper to be turned into something new.

I am where you can go to see how many kilowatts the school is using on a daily, monthly, or yearly basis. I bet it gets expensive to keep this on in the school.

I am found in the middle of the deciduous trees located behind the building in which underclasses learn.

I am a place where the school was presented to the community but it's such an odd place to put the plaque that's located there.

I am how Ms. Holt's gets to work everyday. Some call it silver but I call it pewter.

I am the door in which I go to if I want to fill my tummy. I know I must be very quiet or I will end up at the end of the line.

I am what some call the school mascot. I am not real but made of metal which I think is kind of cool.

I am a teacher that passes on much scientific Earth Science knowledge. You may try to hate her but you can't help but love her.
