

#1 Your space shuttle just crashed because the engine blew up. You are stuck on planet Earth. Work together to fix the space shuttle.

#2 Go look for an engine part under the large hoop where kids shoot hoops.

#3 Find the part you need on a toy that lets 2 kids go up and down.

#4 Look next in the area where students act just like monkeys.

#5 Now, your team must locate the area that has 2 kids racing while going down instead of one.

#6 The next place you will find an engine part will have a big twist.

#7 Go to the doors that have a shelter over head.

#8 Finding a place to pump can be hard to find. Look on the big playground side.

#9 There is a special tree where kids line up to play kickball.

#10 Your team collected all the pieces you need. Meet under the big equipment to repair the shuttle
