

Take a picture of the big Earth. Write about two things we learned this year, that it talks about.

Go to the Whispering Gallery. Take a picture of yourself whispering into the dish. Describe what happens. How does that apply to what we have learned this year.

What are some important phases of prenatal development. Take a picture of 2 and describe them.

Take a picture of what you might possibly look like in the future. What changes do you notice?

Watch a movie of how a baby develops in the womb. What are two amazing things that happen, and when? Pic.

Take a picture of Newton's Cradle. Explain how it applies to Newton's Laws of Motion.

Try to "projectile" and object as far as you can. How does it apply to speed? Velocity? Explain. Take a pic.

Rotate a mirror in Newton's Prism. Explain what happens to the white light. Take a pic.

What happens when you remove a wavelength of color from the color spectrum room? What happens when you add it back? Take a pic.

Adjust the frequency of a wave, and describe what happens to the amplitude and wavelength. Take a pic.
