

I am white but I am bright in the night.

Black cats roam at night. They hiss and bite.
Along a fence is where they hide.

They say that bats come out at night. Don't
be overcome with fright. A bat hangs in a
tree out of sight.

We light the night with our eerie faces
shining bright.

Beware of the woman dressed in black.
Your clue is hidden in her hat.

If you carve this out and then stick in a
candle light, the result of this should be you
give someone a fright.

This body has no ears or tongue.
He's not able to use phones.
Tickling doesn't work on him,
because he's only made of bones.

In the center of this design, are several
trapped little flies. Heading in to eat them
all is a spider with bulging eyes.

There is a pupil inside this but saying
it's a school is not right. When you
see this lying around, You'll know
someone's lost their sight.

If you get lost in the middle of nowhere,
and come across this place in the night,
think twice about knocking on their front
door. You'll get a big fright.
