

To start a pirate adventure you need this without fail if you are to travel around you need something on which to sail

When you meet a pirate you might say aye aye but don't stare too closely at what's covering his eye eye

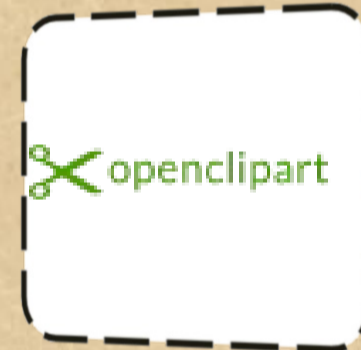

You end up crashing into rocks if your your ship you cannot turn so use this important equipment to control the rudder at the stern.

is that an island in the distance or other pirates coming your way? just look into this handheld telescope and then you can see!

If you want to know where you're going There's an item that's the best at helping you know which direction is north, east, south, and west.

When looking for buried gold this item helps a lot as on this piece of paper X marks the spot!

Now you're getting close to land you need your pirate ship to stop so you'll take down all your sails and this object in the water you drop

If you think there is an echo a second voice that can be heard, it's not a person causing this but actually a bird.

if you find a treasure chest the value of whats inside is great there's lots of shiny currency .also known as pieces of eight

Thanks to all my helpers for finding me gear and treasure hope to see you tonight at the movies to meet you would be a pleasure
