

Find a little critter that would wait by my door when we were dating.

Spot a bird who would flit in the trees out our apartment window and knock loudly.

This roly-poly nuisance loved to get into our back yard garden.

Can you find the bird that helped us make our way to church?

Though a slow-moving creature, he managed to outrun us and escape the yard.

We don't want them around because they chewed every thing at 360 Pratt, but track one down anyway.

We would see this out in the Carolina blue water.

He found us one Christmas Holiday!

132 degrees at 318 Bills.

Yours forever.
