

Find something that rolls.

Finding something that needs a battery to work.

Find something that requires programming/coding to work.

Find something that needs the Internet to work.

Find something that you have to build with your hands.

Find something that responds to your voice.

CHALLENGE:  
Find something made by ADDitive manufacture (how a 3D printer builds up using material)

CHALLENGE:  
Find something made by SUBTRACTive manufacture (how a laser cutter makes by cutting through or around material)
